Telehealth Professional Practice Assignment

Overview of Project: Student will develop a paper that addresses how telehealth can be integrated into professional practice.

Objectives:

1. Describe how telehealth can be integrated into practice.
2. Define the model of telehealth delivery.
3. Identify benefits and barriers to telehealth in a practice setting.

Guidelines:

Please write a 1.5 to 2-page paper in APA format on the use of telehealth in your professional practice. Turn it in to your advisor by the due date of…… You will need to:

1. Find a peer reviewed article (Research or Review Paper) that presents the use of telehealth in your professional practice (i.e., NP, CRNA, CNS, etc). A pdf copy of the article must be attached to your submission.
2. Provide a one paragraph overview of the article.
3. Describe a piece of technology that you observed during the weekend on campus (link this back to the article, i.e., Telehealth for transition of care managment). How would this technology improve care delivery in your professional practice setting (or future setting)?   You can choose a device that your team did present.
4. Discuss the potential benefits of the technology to your practice or patient population.
5. Describe the potential barriers of this the technology to your practice or patient population.

Category	Points	Feedback
Research article • Peer reviewed • Relevant to practice setting	2/	
Annotation • One paragraph • Succinct • Clarity of overview	4/	
Technology • Clearly describes purpose and use • Link device back to the article • Consider cost • Reimbursement • Required staff • What type of service (care) does this device deliver? • How is the care delivered? synchronous vs asynchronous	6/	
Benefits	3/	
Barriers	3/	
APA formatted	2/
