

Determine Telehealth Policy in My State

Overview of Project

This project helps students identify and understand local and regional telehealth policies changes amid the Covid19 pandemic. Resources link to state policies and current evidence.

Objectives

- Describe telehealth policy in your state as it relates to practice and reimbursement.
- Analyze the impact of policy changes post-COVID-19.
- Develop an infographic related to your findings.

Guidelines (including links to article, source document)

Students will create an infographic report, 3-5 pages in length, 12-point font, and APA format for references. The report will discuss the selected geographic region, pre-Covid19 telehealth policies, Covid-19 policy changes, and the impact of Covid-19 policies on the utilization of telehealth within the selected geographic region.

The report will include a combination of infographic images (3-5) and accompanying text that explains the content presented in the infographics.

The following resources will provide students with information regarding telehealth policies. Students may use the below resources or other resources as long as they are cited in the main document.
