10	28	Mental Health	Develop a Consent Protocol	Handling Emergencies During Telehealth	Justin Petri Hamid Okhravi
	29		Develop a Consent	Establishing the visit	
	30		Develop a Patient Instruction Sheet	Conducting the Telehealth Visit	

Instructions: You will work with your assigned groups (See Groups tab) to develop the two deliverables to be uploaded and delivered to your faculty providers assigned to your team by midnight on Tuesday, April 14. The population and healthcare issue that your group has been assigned is listed on this table. In addition, you have one or two faculty that will be available to give you input into what they need for their practices. The protocols/consents that you develop will be used to help implement Telehealth within their practices at EVMS. Remember that your work here is not just an assignment but needed to actually create strong telehealth programs at EVMS.
